If you feel your bell is too dangerous to swing due to aging bell equipment, or you would like more options without replacing all your current equipment, we have a solution. The WCC2200-A restores your ability to once again ring your bell by installing a striker upgrade kit.

With the WCC2200-A, you can upgrade to a new digital carillon system with 7inch touch screen, automatic daylight savings time, hour strike, Angelus, call to worship and funeral toll.

With the Carillon option, speakers can be installed in conjunction with the WCC2200-A striker to play real bell sounds, including Westminster, and your favorite holiday melodies.
